## To the Reader

T

HE French language, like the English language, is the key to a very old and a very vast culture.

It opens, to him who possesses it, a world of ideas and inspiration, and permits him to get to the origin of thoughts which, in all epochs, have enriched the common property of humanity and have made it possible to know and to appreciate many original works which hold a primary place in universal literature, from Montaigne, Racine and Molière to the magnificent flowering of the writers of today.

By its exactness and its clarity which have made it adopted as the diplomatic language, by its finesse and its nuances, the French language is, from the intellectual point of view, an incomparable instrument of exchange, and in many countries the elites make a point of reading and speaking it.

To those who aspire to know it well and to extract from it all the spiritual benefit which it gives, the Larousse Publ. Co presents here the best books to facilitate its study and assure its correct use : the "*Larousse dictionaries*", recommended everywhere as the best French dictionaries, and concise, scholarly works, practically compiled. Furthermore, one finds in these pages the writings from classical and modern authors, carefully selected and agreeably presented, and various works summarizing the modern French culture in the most attractive form.
