CRANE

"TOMORROW'S BATHROOM...AVAILABLE TODAY"

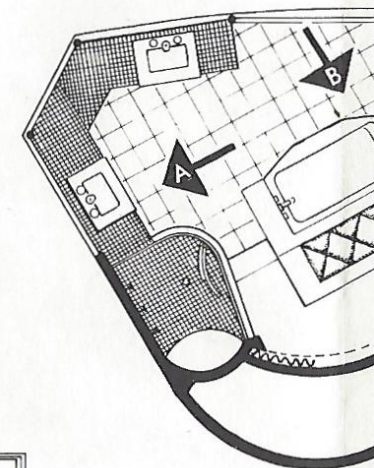

PLUMBING

This fabulous bathroom, actually designed for the future, is available for your home today! This is due to Crane's progressive forward look in styling. The distinctive charm and elegance of Crane fixtures, styled by Henry Dreyfuss, world famous designer, complement the modern homes of today. Their modern look will keep them up-to-date for years to come.

Crane engineering, like Crane styling, brings you Dial-ese—the water controls of tomorrow, available today. They open easier than ordinary fittings and last ten times as long.

(For complete specifications see inner flap of this folder.)

HEATING AND AIR CONDITIONING

Tomorrow's bathroom incorporates the type of heating and cooling which will make you forget the weather. The wonderful sunny warmth of Crane Sunnybase radiant heating in the cold of winter provides comfort with no drafts, hot or cold spots.

A hot water boiler of advanced design and guaranteed for twenty years, the Crane Sunnyday, furnishes the heat for the system.

Clean, filtered, cool air for those hot days of summer comes from a centrally located Crane air conditioner, engineered to operate dependably and efficiently in any climate.

"A Bathroom in Miniature"

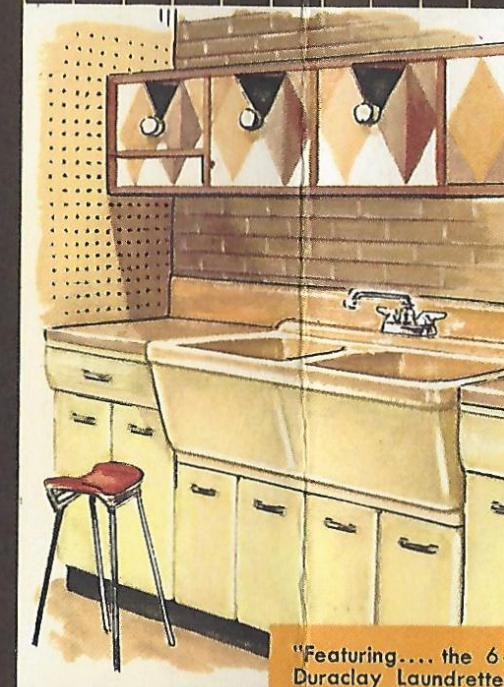

The above intricately engineered scale-model "See-Yourself" bathroom is an extraordinary feature of the exhibit. This small bathroom is scaled to precision dimensions. The visitor, looking into a specially designed window, first sees a complete bathroom, next the piping behind the walls, and finally himself standing in the room.
